Bhajan

Canto Devozionale

metodo avanzato per harmonium

Miei Cari,

la musica è il suono dell'Amore.

La preghiera che senti nel cuore ti avvicina a Dio.

La felicità si trova nell'unità, non nella dualità.

I discepoli si riuniscono ai piedi del Maestro
che dà loro protezione come un grande albero di bahnyan.

Solo i vasi vuoti possono essere riempiti.

Solo le menti umili e anelanti possono essere illuminate.

Quando la mente cessa di agitarsi il Sé comincia
ad illuminare il sentiero.

L'ego è una limitazione e trascina l'uomo nelle tenebre.

I raggi del sole splendono attraverso la coppa di cristallo.

L'onniscienza pervade il potere intelligente dell'uomo.

L'abbandono totale a Dio vi guida alla dimora divina.

Perdendo l'io individuale, si raggiunge l'Io universale.

Vi benedico

Shrī Sathya Sāī Bābā

LINEE GUIDA BHAJAN

- Non vergognatevi mai di cantare il nome di Dio; state, invece, fieri di averne l'opportunità e felici di potere usare la lingua nel modo migliore.
- I devoti devono prendere posto alcuni minuti prima dell'inizio dei bhajan. Sāī Bābā ha dichiarato che dovunque il Suo nome verrà cantato, Egli sarà sempre presente. Ricordiamoci con convinzione di questa presenza.
- Donne e uomini devono sedere separatamente, le une da un lato, gli altri dall'altro, in file, gli uni dietro agli altri. Coloro che conducono i bhajan o che suonano strumenti siedono nelle prime file.
- Gli strumenti musicali non devono coprire la voce del conduttore e di coloro che seguono.
- Ogni riga del bhajan non dev'essere ripetuta più di due volte, così come due sono i ritmi: uno più lento ed uno più veloce. In questo modo possono essere cantati più bhajan, dando maggior gioia ai partecipanti.
- Durante i bhajan non guardiamo gli altri, né sorridiamo loro, scambiandoci saluti e disturbando così la nostra e l'altrui concentrazione.
- Non dondolate il corpo come un pendolo e non battete le mani fuori tempo. Esercitando l'autocontrollo si manterrà un perfetto silenzio e si ridurranno i movimenti al minimo.
- Se la nostra voce non è dolce o piacevole, stiamo quieti: è questo il miglior servizio che possiamo fare.
- Non si deve causare malcontento, discordia o disarmonia volendo cantare a tutti i costi, forti del fatto di ricoprire una qualsiasi carica o responsabilità.
- I bhajan devono risultare dolci all'ascolto.
- Cantate bhajan conosciuti, così che tutti ne possano condividere la serenità e la gioia. Cantate in qualsiasi lingua, purché tutti possano seguire.
- Prestate attenzione al tono, al significato, alle variazioni, alla voce, al ritmo, alla melodia.
- Cantando i bhajan ci si soffrii anche sul significato del canto e sul messaggio relativo ad ogni nome e forma di Dio.
- I bhajan devono essere cantati ed offerti a Dio in estrema umiltà; non devono essere considerati un'esibizione di talento né una competizione. Essi devono compiacere Dio e non i nostri ammiratori.
- I bhajan devono essere un'esperienza sentita. Non cantiamo con un occhio sugli effetti che il canto produce sugli ascoltatori e l'altro sugli effetti che esso produce su Dio. Fate che il cuore brami il Signore, allora il ritmo e la melodia saranno automaticamente piacevoli e corretti.
- I bhajan debbono condurre ad un'emozionante esperienza che deve lasciare i partecipanti colmi di pura energia ed elevante entusiasmo.
- Per mezzo dei bhajan la mente dovrà essere resa pura, libera da passioni e rafforzata nella fede.
- I bhajan sono una disciplina spirituale per tutti coloro che ne prendono parte.
- Il canto dei bhajan è un buon processo disciplinare per mezzo del quale *kāmā* e *krodha* possono essere tenuti lontani. *Kāmā* è il desiderio per i piaceri fisici, il potere, la fama, la ricchezza, l'erudizione; *krodha* è l'ira derivante dalla mancata soddisfazione del desiderio. In quest'epoca colma di paura ed ansietà, il ricordo di Dio e la ripetizione del Suo nome sono gli unici strumenti accessibili a tutti per il raggiungimento della liberazione.
- Finché canterete i bhajan esclusivamente per la vostra gioia, non potrete di certo recare gioia agli altri. Solamente quando il sentimento sorgerà dal cuore, il canto farà appello al cuore degli altri. Il Signore sarà compiaciuto solo quando la nota chiave sarà l'amore, quando prevarrà un sentimento di unità, quando la melodia giungerà da cuori puri e devoti.
- I bhajan dovrebbero lasciare ai partecipanti uno stato d'animo reso elevato e sublime dall'atmosfera creata dai canti spirituali. Dopo i bhajan i devoti dovrebbero accomiatarsi quietamente, mantenendo il silenzio. Allora la pace e la gioia dei bhajan dimoreranno più a lungo nel cuore.

LA TASTIERA

b = **bemolle** : mezzo tono sotto la nota originale

= **diesis** : mezzo tono sopra la nota originale

N.B.: Come si può notare sulla tastiera, il MI può chiamarsi FAb, il FA (Mib), il SI (Dob) e il DO (Sif), ma il tasto della tastiera rimane il medesimo. Questo serve semplicemente a non saturare la scala su cui si costruisce un accordo, mantenendo una nota per ogni suo grado, pertanto quando incontreremo una nota come SI# la considereremo come un normale DO.

Introduzione

Cos'è un accordo

È la combinazione di tre o più note suonate simultaneamente in un contesto tonale. Nella musica popolare viene utilizzato per arricchire e sostenere la melodia.

Gli accordi fondamentali possono essere maggiori, minori, diminuiti o aumentati.

La logica musicale della costruzione di un accordo, comprende la conoscenza dei principi dell'armonia che, sviluppati in questa sede, rischierebbero di togliere immediatezza a questo "manuale pratico". Rimandiamo pertanto, chi volesse approfondire, giustamente, l'argomento, ai manuali di armonizzazione moderna in vendita nei migliori negozi di musica.

Come funziona questo metodo?

Questo metodo è stato concepito per razionalizzare l'apprendimento dell'accompagnamento dei bhajan e si rivolge sia ai neofiti che a chi già possiede una discreta padronanza nell'uso degli accordi.

In genere, chi si avvicina all'accompagnamento dei bhajan investe grande energia nell'apprendimento dei singoli bhajan senza sapere che molti di questi utilizzano lo stesso giro armonico, vale a dire gli stessi accordi, ma disposti in maniera diversa e spesso in un'altra tonalità.

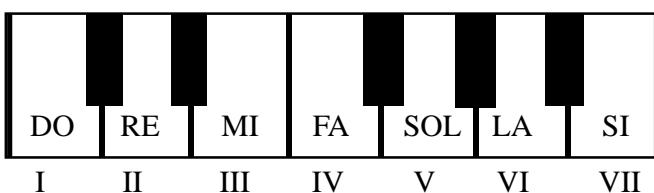

Che cos'è un "giro di accordi"?

Il "giro di accordi" rappresenta la struttura armonica di un accompagnamento musicale ed è indipendente dalla tonalità in cui lo si esegue; esso ha un suo carattere specifico, si potrebbe paragonare, nella gastronomia, ad un piatto costituito da vari ingredienti.

Il giro di accordi si basa sui gradi della scala

Come le scale su cui camminiamo sono fatte di gradini, la scala musicale è fatta di "gradi".

Es. di gradi della scala in tonalità di DO maggiore

Per nostra convenzione, **gli accordi di un "giro"**, seguendo il criterio della Berkley School (la più importante accademia di musica moderna degli U.S.), **si formano sui gradi di una scala maggiore diatonica** (per intenderci, la nostra scala di DO appena citata è una scala maggiore diatonica).

Se sappiamo distinguere tra un piatto di "insalata russa" da una "caprese", non avremo bisogno ogni volta di ricordarne gli ingredienti; allo stesso modo, sapremo che sotto quel tipo di melodia andrà utilizzato quel determinato "giro di accordi."

Infatti, questo metodo consiste nell'imparare a conoscere bene i vari giri di accordi in tutte le tonalità per sviluppare, nel tempo, la capacità di accompagnare i bhajan senza dover seguire il libro ma basandosi sulla sensibilità acquisita attraverso la pratica.

Imparare un "giro" d'accordi significa conoscere gli accordi che lo compongono in almeno cinque tonalità, questo richiederà un piccolo sforzo di memorizzazione ma permetterà di eseguire molti bhajan in un "colpo solo".

Per esempio:

Gli accordi di: Bolo Nârâyana Jai Jai Vitthalâ sono gli stessi utilizzati in:

Molti “giri di accordi” inoltre, si differenziano solo per un accordo, pertanto il lavoro fatto su un singolo giro verrà capitalizzato per l’apprendimento dei successivi.

UNA VOLTA APPRESI GIRI DI BASE IN TUTTE LE TONALITÀ
É POSSIBILE ACCOMPAGNARE QUASI TUTTI I BHAJAN.

(vedi appendice ed esercizi)

Prendiamo ad esempio i bhajan sopra elencati, possono essere suonati con gli stessi tre accordi:

DO FA e SOL che sono, nell’ordine: il I° il IV° e il V° accordo nella scala diatonica di DO maggiore.

E’ possibile suonare tutti i bhajan sopraelencati con DO, FA e SOL ma in molti casi la melodia risulterà troppo alta o troppo bassa e ci troveremo nella necessità di suonare gli accordi in un’altra tonalità’.

Se ci trovassimo in tonalità di RE maggiore gli accordi sarebbero RE, SOL e LA; diversi come accordi ma la struttura del “giro” rimarrebbe invariata in quanto questi accordi si costruiscono sempre sul I°, IV° e V° grado della relativa scala (in questo caso) di RE maggiore.

In pratica, gli accordi DO, FA, SOL, (in Tonalità di DO) saranno, in altre tonalità:

I°grado	IV°grado	V°grado	della scala MD
REb	SOLb	LAb	in tonalità di REb
RE	SOL	LA	in tonalità di RE
Mib	Lab	SiB	in tonalità di Mib
MI	LA	SI	in tonalità di MI
FA	SiB	DO	in tonalità di FA
FA#	SI	DO#	in tonalità di FA#
SOL	DO	RE	in tonalità di SOL
Lab	REb	Mib	in tonalità di Lab
LA	RE	MI	in tonalità di LA
SiB	Mib	FA	in tonalità di SiB
SI	MI	FA#	in tonalità di SI

...ma appartengono alla stessa struttura armonica vale a dire: al I°, IV°, V° grado della scala maggiore. Questo giro si chiamerà infatti: “I, IV, V”.

Una buona conoscenza delle scale maggiori permetterà di individuare con più facilità gli accordi relativi alle varie tonalità.

Le scale Maggiori che é bene conoscere a memoria sono le seguenti:

Gradi della scala MD:	I	II	III	IV	V	VI	VII	
Tonalità di DO	=	do	re	mi	fa	sol	la	si (nessuna alterazione in chiave)
Tonalità di DO#	=	do#	re#	mi#	fa#	sol#	la#	si# (7 diesis (#) in chiave)
Tonalità di REb	=	reb	mib	fa	solb	lab	sib	do (5 bemolle (b) in chiave)
Tonalità di RE	=	re	mi	fa#	sol	la	si	do# (2 diesis (#) in chiave)
Tonalità di MIb	=	mib	fa	sol	lab	sib	do	re (3 bemolle (b) in chiave)
Tonalità di MI	=	mi	fa#	sol#	la	si	do#	re# (4 diesis (#) in chiave)
Tonalità di FA	=	fa	sol	la	sib	do	re	mi (1 bemolle (b) in chiave)
Tonalità di FA#	=	fa#	sol#	la#	si	do#	re#	mi# (6 diesis (#) in chiave)
Tonalità di SOLb	=	solb	lab	sib	dob	reb	mib	fa (6 bemolle (b) in chiave)
Tonalità di SOL	=	sol	la	si	do	re	mi	fa# (1 diesis (#) in chiave)
Tonalità di LAb	=	lab	sib	do	reb	mib	fa	sol (4 bemolle (b) in chiave)
Tonalità di LA	=	la	si	do#	re	mi	fa#	sol# (3 diesis (#) in chiave)
Tonalità di SIb	=	sib	do	re	mib	fa	sol	la (2 bemolle (b) in chiave)
Tonalità di SI	=	si	do#	re#	mi	fa#	sol#	la# (5 diesis (#) in chiave)

N.B. La tonalità di DO# si utilizza solo quando é in minore mentre quelle di RE#, SOL# e LA# non verranno mai utilizzate, preferendo quelle omologhe, più semplici: in MIb LAb e SIb

Scale

Per sviluppare una tecnica che consenta di eseguire un buon accompagnamento, alternando accordi, melodia e frasi di fioritura (alla maniera indiana), é necessario praticare la scale in tutte le tonalità, cercando di sviluppare una certa padronanza.

Le scale andranno eseguite su due ottave con andata e ritorno.

Non ha tanto importanza la velocità di esecuzione, quanto la pulizia del suono; uniforme su tutti i passaggi.

Per la pratica di questo esercizio é di fondamentale importanza l'uso del **metronomo**.

All'inizio, il metronomo va regolato ad una velocità adeguata alle proprie possibilità tecniche, se possibile anche più lento.

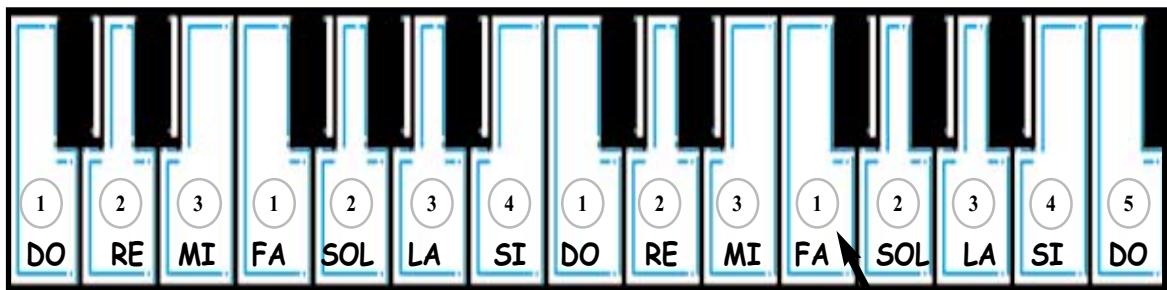

Le scale dovranno essere eseguite accentando le note ad una ad una in sincrono con il tempo del metronomo. Una volta raggiunta una pulizia e omogeneità di suono e ritmo si potrà incrementare di due unità (BPM) la velocità del metronomo.

N.B. Nella musica occidentale esistono molte scale diverse da quella maggiore:

Minore, minore armonica, minore melodica, diminuita ecc.. Rimandiamo questo approfondimento ai trattati di solfeggio e armonia. In questo contesto considereremo la scala maggiore, come la scala principale su cui iniziare a sviluppare la tecnica. La melodia di ogni bhajan, nella cultura indiana, si basa su scale chiamate raga, e a differenza della nostra scala maggiore, spesso, a seconda del raga, le scale ascendenti sono diverse da quelle discendenti. Esistono più di seicento raga e trattarli tutti ci vorrebbe un metodo a parte.

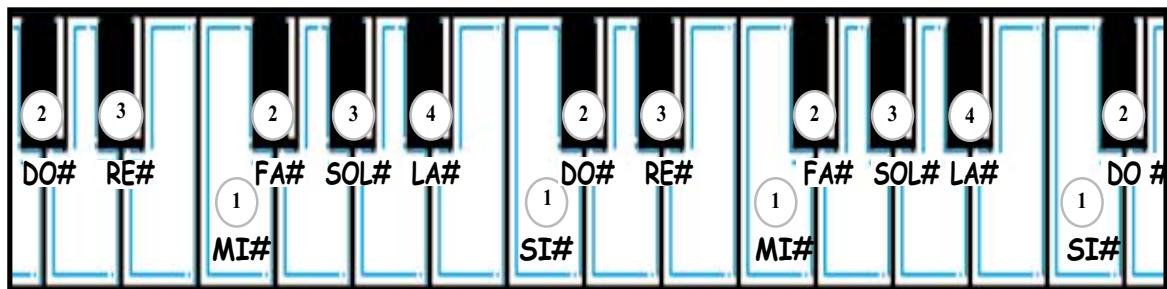

Una volta acquisita una certa padronanza con le scale maggiori, per praticità consigliamo di identificare il raga dalla melodia del bhajan che si sta studiando e praticarne la “scala” con la diteggiatura appropriata.

La notazione del libro

Come si é detto, un "giro" si basa, per convenzione, sui gradi di una scala diatonica maggiore e la notazione **viene rappresentata in numeri romani MAIUSCOLI e minuscoli:**

I ii II iii III IV v V vi VI vii VII

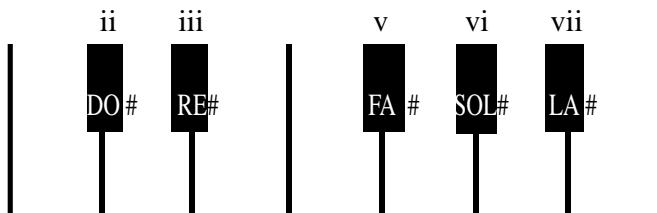

I numeri romani **MAIUSCOLI** raffigurano i sette gradi della scala maggiore diatonica...

Es. in tonalità di DO:

...e quelli **minuscoli**: i "tasti neri", i 5 semitonni che non sono compresi nella scala.

Es. in tonalità di DO:

In tonalita' di DO le note che denominano gli accordi avrebbero questo valore, corrispondente al loro grado relativo:

I	ii	II	iii	III	IV	v	V	vi	VI	vii	VII
DO	REb	RE	Mib	MI	FA	FA#	SOL	LAb	LA	Sib	SI

Mentre in tutte le altre tonalità avremo le seguenti sequenze:

I	ii	II	iii	III	IV	v	V	vi	VI	vii	VII
DO#	RE	RE#	MI	FA	FA#	SOL	SOL#	LA	LA#	SI	DO
REb	RE	Mib	MI	FA	SOLb	SOL	LA	LA	SIb	SI	DO
RE	Mib	MI	FA	FA#	SOL	LA	SIb	SI	SI	DO	DO#

Come si potrà osservare nel libro, questo tipo di notazione la ritroviamo sotto ogni bhajan, in sostituzione degli accordi che siamo abituati a leggere sull'equivalente libro degli accordi.

Essi rappresentano, come appena accennato, i gradi della scala su cui gli accordi si formano.

Supponiamo di trovarci in tonalità di DO maggiore:

gli accordi utilizzati saranno: DO FA SOL e SIb.

Nel caso della tonalità in cui ci troviamo (Do maggiore) gli accordi saranno i seguenti:

I	ii	II	iii	III	IV	v	V	vi	VI	vii	VII
DO	**	**	**	**	FA	**	SOL	**	**	SIb	**

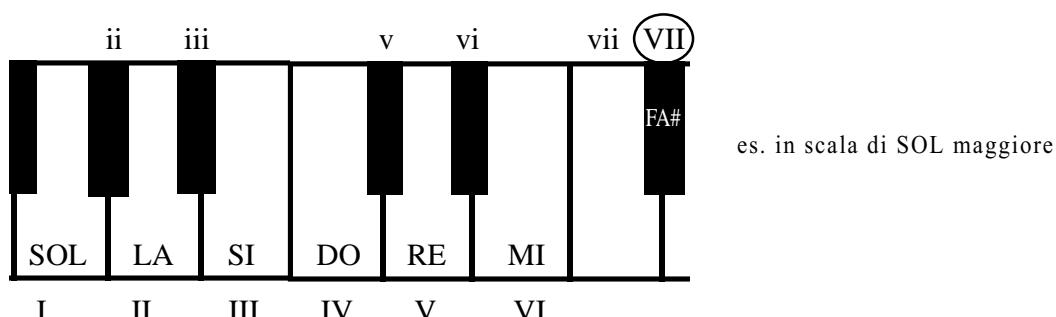

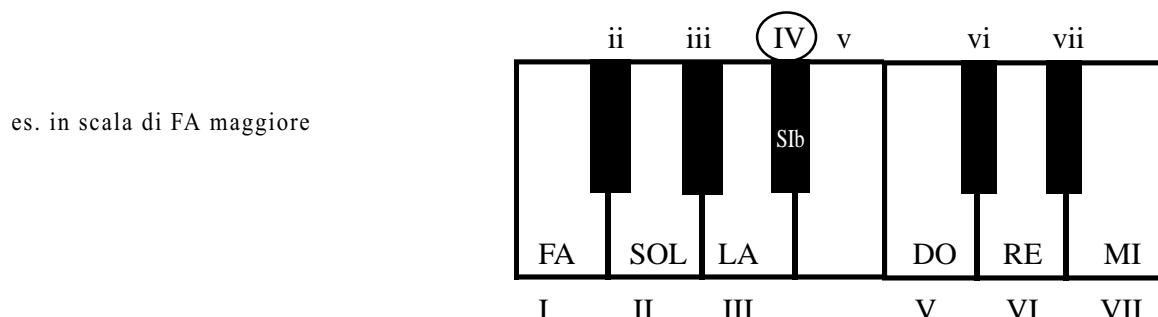

La struttura di questo giro si compone quindi dei seguenti gradi della scala:

I/ IV/ V/ vii

Se volessimo suonare il giro “I/ IV/ V/ vii” in tonalità di LA maggiore gli accordi e i relativi valori sarebbero i seguenti:

I	ii	II	iii	III	IV	v	V	vi	VI	vii	VII
LA	**	**	**	**	RE	**	MI	**	**	SOL	**

Altri esempi di gradi applicati ad una tonalità data:

Il tipo di accordo:

A fianco dei gradi che raffigurano gli accordi del “giro” troviamo gli stessi simboli che definiscono la natura dell’accordo.

Imparare a riconoscere gli accordi

Come accennato, un accordo si compone di gruppi di note e il tipo di accordo è dato dalla distanza in semitonni tra esse.

- Per ricostruire un accordo, agli inizi, la strada più semplice è quella di contare i semitonni:

COMPOSIZIONE DEGLI ACCORDI UTILIZZATI IN QUESTO TESTO

Tipo di accordo	notazione	semitoni
maggiore	XX	0 / 4 / 7
minore	XXm	0 / 3 / 7
4 ^a	XX4	0 / 5 / 7
minore 4 ^a	XXm4	0 / 3 / 5 / 7
5 ^a aumentata	XX5#	0 / 4 / 8
5 ^a diminuita	XX5b	0 / 4 / 6
diminuito	XX°	0 / 3 / 6
maggiore 6 ^a	XX6	0 / 4 / 7 / 9
minore 6 ^a	XXm6	0 / 3 / 7 / 9
maggiore 7 ^a	XX7	0 / 4 / 7 / 10
minore 7 ^a	XXm7	0 / 3 / 7 / 10
maggiore 7 ^a maggiore	XX7+	0 / 4 / 7 / 11
minore 7 ^a maggiore	XXm7+	0 / 3 / 7 / 11
maggiore 9 ^a	XX9	0 / 4 / 7 / 14
minore 9 ^a	XXm9	0 / 3 / 7 / 14

Come si usa questo libro

- Per facilitare l'individuazione degli accordi sono state utilizzate le sigle in uso corrente nella notazione della musica leggera e, anche se per l'utilizzo di questo libro non è indispensabile averne cognizione, sarà opportuno studiare il prospetto alla pagina precedente.

Ogni sigla è segnata all'altezza del punto del Bhajan in cui va suonato l'accordo.

Le parentesi

Al fine di semplificare l'esecuzione, quando uno o più accordi o note sono tra parentesi, possono non essere eseguiti.

Le ripetizioni

Il bhajan ha una struttura antifonica; il pubblico risponde ripetendo quello che canta il solista e ogni frase può essere ripetuta o variata.

Il bhajan, normalmente, viene cantato due, raramente tre volte, la seconda sempre più veloce della prima, con il fine di far crescere l'intensità.

Il numero riportato tra parentesi, sta ad indicare quante volte la riga del bhajan a cui corrisponde, verrà ripetuta dal solista.

Le ripetizioni riportate sul lato sinistro del testo fanno riferimento alla prima volta che il bhajan viene eseguito mentre quelle sul lato destro, alla seconda. Quando nella parentesi sono riportati due o più numeri intervallati con il segno + (es.: (1+2)), la riga subirà delle variazioni melodiche e/o ritmiche pur mantenendo le stesse parole e accordi. I tre trattini (---) segnalano che in quel punto del bhajan la riga non andrà cantata.

Va precisato che le ripetizioni riportate su questo testo, fanno riferimento alle cassette e pur rappresentando un ottimo riferimento per l'esecuzione del bhajan non dovrebbero essere considerate vincolanti. La logica delle ripetizioni segue un criterio estetico ed emozionale. Dopo molti anni di esperienza un leader bhajan, sa e sente, a seconda dell'intensità del momento, se è il caso di ripetere una riga o passare a quella successiva.

La continuità armonica

In genere è bene che le note di un accordo “risolvano” sulle note più vicine a quelle dell'accordo che segue, sia per una maggiore facilità di esecuzione, sia per ottenere un migliore effetto armonico.

Es DO - SOL

Le note che compongono l'accordo di DO maggiore sono nell'ordine do - mi -sol,
quelle che compongono l'accordo di SOL maggiore sono nell'ordine sol - si - re.

Per ottenere la continuità armonica suoneremo:

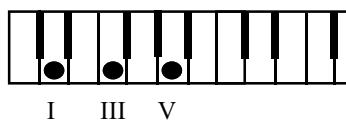

do - mi -sol mi -sol - do sol - do -mi
si - re - sol re - sol - si sol - si - re,
scegliendo così il rivolto più appropriato.

I rivolti

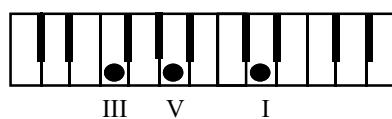

Le note che compongono un accordo possono essere suonate con un ordine diverso. Cambia il sapore dell'accordo ma la sua natura rimane invariata.

ES. : REm

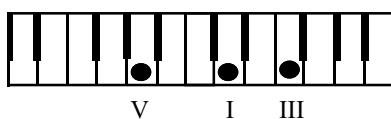

REm I rivolto = re fa la

REm II rivolto = fa la re

REm III rivolto = la re fa

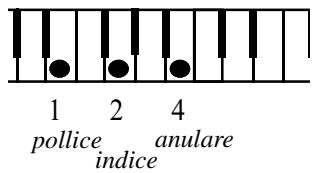

La diteggiatura

L'uso di tutte e cinque le dita della mano facilita il passaggio da un accordo all'altro ed è per questo utile organizzarsi la diteggiatura più congeniale.

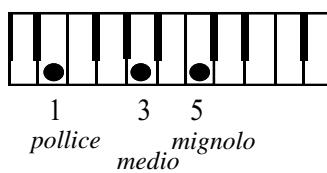

(Per annotare la diteggiatura si conta dal pollice, che corrisponde a 1, fino a 5 che corrisponde al dito mignolo).

ES. : da MIm a LAm

MIm = mi sol si

LAm = mi la do

Quando incontriamo due accordi come quelli appena citati, che hanno alcune note in comune, è bene mantenere ferme (legate) le note comuni (mi) senza risuonarle; ciò consente di mantenere una migliore continuità armonica.

Raga e giri di accordi

I raga possono essere considerati un po' come le nostre scale e per ogni raga è utilizzabile lo stesso giro di accordi.

Di seguito, presentiamo i giri di accordi eseguibili a seconda dei Raga principali utilizzati nei bhajan.

Sostituzione degli accordi

La scelta degli accordi di una melodia appartiene al gusto personale in quanto non ha regole fisse; ciò deve spronare chi si avvicina a questo mondo a sviluppare una propria sensibilità nella scelta degli accordi, cercando di rispettare la cultura dalla quale i bhajan sono stati presi a prestito, cosa fondamentale, che l'accordo di sostituzione non entri in conflitto con la melodia.

A questo proposito va sottolineato il fatto che la scelta di un accordo al posto di un altro può facilmente stravolgere l'emozione che trasmette una melodia.

Nella scelta degli accordi si è principalmente cercato di mantenere lo spirito del bhajan nella sua originalità anche se talora sono stati utilizzati abbellimenti armonici più vicini alla nostra cultura.

Dove è stato possibile si è cercato di dare un'alternativa armonica, dove per esempio la frase del bhajan si ripete.

ES.: Bhajan n. 368 -

Shivāya Parameshvarāya Chandrashekharāya Namah̄ Om
Im IV V IV (V) IV V Im
(oppure) Im vi (II) V Im

ES.: Bhajan n. 115- Cassetta 6 - Lato A - Brano 3°

Gurudevā Sharaṇam Devā
Im I°(*) Im (* = (oppure) II)
(oppure) (vi) IV Im

In questo bhajan le ultime due righe hanno la stessa melodia, gli accordi sono suonati in successione diversa. Non si può dire che siano più giusti gli accordi suonati sulla prima frase che non nella seconda, o viceversa, bensì che le tensioni che esistono tra accordi e melodia, sono differenti.

Molti accordi si differenziano tra di loro solo per una nota e possono essere intercambiabili.

Es tonalità maggiore

IIm = IV
IIIIm = V
IV = VIm. (non sempre)

Es tonalità minore

IVm = vi
Vm = vii
IVm = vii. (non sempre)

Consigli pratici

L'impostazione del corpo

Deve essere fluida e senza contrazione alcuna.

La mano é parallela all'avambraccio, e sarà la posizione della spalla a determinarne l'inclinazione.

La mano dovrà inoltre essere morbida (per chi é abituato all'utilizzo del computer) come se fosse appoggiata sul mouse.

Le dita affondano sui tasti a "martelletto" toccandoli il più possibile con la parte superiore della falange e non con il polpastrello.

I primi tempi (per abituarsi), é utile enfatizzare il movimento delle dita quasi a percuotere il tasto.

Quando non ci si trova di fronte allo strumento, un'esercizio utile, sarà quello di tenere la mano appoggiata su di un piano e, senza muoverla, percuotere con forza la base con ogni dito.

I primi tempi esercitarsi davanti allo specchio aiuterà a correggere eventuali difetti di impostazione.

Il movimento delle dita

Nell'esecuzione di scale o passaggi melodici, il pollice passa sotto la mano quando il movimento é verso l'alto (destra).

Nei movimenti verso il basso (sinistra) saranno il secondo, terzo e quarto dito a scavalcare il pollice.

Il mantice

Non é soltanto un accessorio per pompare l'aria nell'Harmonium ma influisce su tutta l'espressività del suono.

E' bene pertanto avere la stessa considerazione tanto per la tastiera quanto per il mantice.

- La passione e la volontà sono il primo ingrediente per lo studio della musica.
- Qualunque limite può essere superato con l'esercizio.
- È meglio studiare poco tutti i giorni che tanto sporadicamente.
- Se si è agli inizi, è bene scegliere i bhajan con meno accordi.
- Per assimilare i vari cambi di accordo conviene esercitare la mano sui singoli cambi fino a quando non diventano automatici dopodiché si può provare ad accompagnare la parte del bhajan che prevede quel cambio di accordi.
- Evitare di scrivere sui tasti i nomi delle note! Agli inizi è preferibile utilizzare lo schema della tastiera allegato al libro; l'individuazione automatica delle note verrà naturale col passare del tempo.

Conclusione

E' utile ricordare che il lavoro ripetitivo dello sviluppo della tecnica é da considerare come se fosse, ne' più ne' meno, come un esercizio di meditazione e sarà proficuo, prima di accingersi allo studio, offrirne i risultati a Dio.

Fretta e aspettative di rapidi risultati rappresentano solo un freno per lo sviluppo delle possibilità tecniche.

Viva l'entusiasmo e l'amore per la musica!

Appendice ed esercizi

Per gli esercizi si utilizzerà questo metodo con i gradi e l'omologo bhajanavali con gli accordi scaricabile al sito http://www.osssi.org/Bhajans/bhajanavali_con_gli_accordi.htm

Come si potrà notare, i giri di accordi sono molteplici ma presto ci si renderà conto che molti di questi sono varianti minime dei giri principali. Una volta acquisita una certa padronanza su un giro di tre accordi, i giri con 4,5 accordi, dello stesso tipo si apprenderanno molto più facilmente. Il concetto è quello di capitalizzare il lavoro svolto e il percorso può essere di due tipi:

- 1) Apprendimento dei giri principali composti di tre accordi (consigliato).
- 2) Apprendimento di un giro composto da tre accordi con i relativi giri derivati, fino a un massimo di cinque accordi per giro.

Es.:

Seq.	I	IV	V
Seq.	I	II ^m	IV
Seq.	I	III ^m	IV
Seq.	I	IV	V

ecc.

I giri con più di cinque accordi dovranno essere studiati successivamente

I primi giri da imparare per primi

Per utilizzare al meglio questo metodo, sarà bene studiare i seguenti giri nell'ordine fissato.

I giri sono stati divisi in quattro gruppi di base da cui derivano la maggior parte dei giri con più accordi.

La conoscenza di questi giri di base permette di accompagnare quasi tutti i bhajan.

ESERCIZIO N° 1 - Utilizzo del bhajanavali con gli accordi

Questi esercizi hanno lo scopo di allenarci ad individuare con immediatezza gli accordi da eseguire.

Scegliere un bhajan nella lista relativa al giro di accordi che si sta studiando e, sul Bhajanavali con gli accordi originali, tradurre in gradi gli accordi del bhajan. Es.:

ESERCIZIO N° 2 Utilizzo del bhajanavali con i gradi

Lavoro inverso rispetto al precedente esercizio.

Scegliere un bhajan nella lista relativa al giro di accordi che si sta studiando e tradurre i gradi del bhajan negli accordi delle tonalità per uomini e donne riportate sulla bacchetta Es.:
